

## Order Entry Interface Options

### Results Only Interface

- Unidirectional results (ORU) interface
- Real-time messages from Quest to the EMR
- If EMR can accept a PDF of the result, that will also be sent to the EMR
- If the EMR is eMDs, then additional training and application support is available for the practice

### With Orders

Adding Orders & Management Tool/  
Dashboard To Existing Results Interface

- Unidirectional orders(ORM) interface
- Redeployment of existing results interface from Quest through our services
- Real-time orders and results from/to the EMR through the Orders Management Tool
- Practice specific mapping/coding
- Dashboard user training
- If using eMDs, then additional training and application support is provided for the practice

### Full Bi-Directional Bi-Directional Orders/Results Interface & Management Tool/ Dashboard

- Bi-directional Orders (ORM) and Results (ORU) interfaces with Quest
- Real-time orders and results from/to the EMR through the Orders Management Tool
- Practice specific mapping/coding
- Dashboard user training
- If using eMDs, then additional training and application support is provided for the practice
